MYRIAM YERALDINNE SANABRIA CARDOZO
Full-Stack Developer

I am a full-stack web developer, I'm skilled in both front-end and back- end technologies, such as PERN, MENR, MEAN Stacks, MongoDB, GraphQL, and others. I am able to create dynamic and interactive web applications that are not only visually appealing, but also highly functional. I am dedicated to constantly learning and expanding my skill set, and always eager to embrace new technologies and take on new challenges. Additionally, my strong teamwork skills and proactive approach to professional development make me a valuable asset to any development team.

PROJECTS

➜ ChatterBox — *Real-Time Chat APP*

In this full-stack real-time chat application, I have utilized my skills in **NextJS 13**, **Upstash Redis database**, **React** for the user interface, and **TypeScript** to create a performant and responsive application. The app features an instant messaging system that leverages the speed of Upstash Redis for quick real-time messaging. Additionally, I have implemented a full friendship system that allows users to add, accept or deny friends. The UI of the app is built with **TailwindCSS**, and sensitive routes are protected for enhanced security. Moreover, the app also offers Google Authentication for a seamless login experience. Overall, my contribution as the developer has resulted in a fully functional chat application that can be deployed to the web and used by actual users.

➜ REAL ESTATE — *APP*

This project is an application developed using **Python, Django, PostgreSQL** and **Bootstrap**. It features a complete adminPanel with full CRUD of properties, employees (realtors) and Users, keyword search and filtering by state, city, price and number of bedrooms and bathrooms. It also has a contact form auto-filled with a logged in user details and a functionality to prevent users from submitting multiple inquiries for the same property, user Dashboard, authentication and mailing system.

➜ SmartNest — *E - Commerce*

The development of an e-commerce application for a SmartHome project called "SMARTNEST" that involves the use of various technologies such as **React, Typescript, Mongoose, MongoDB, Express, Redux, and Node.js.** The application features a user account system validated through Google, and the integration of MercadoPago API for purchasing products. Additionally, there is a news section that consumes a technology API. A user forum with full CRUD functionality that allows users to create, update, and delete their profiles, comments, and posts, as well as like and filter posts by categories. The application also includes a full CRUD admin panel that gives total control over products, users, categories, sales, and forum posts, including soft deletion and statistical graphs displaying recent sales and real-time counts of products and users.

SKILLS

- ❖ React
- ❖ Next.js
- ❖ Angular
- ❖ Express
- ❖ TypeScript
- ❖ JavaScript
- ❖ Node js
- ❖ PostgreSQL
- ❖ Mongoose
- ❖ MongoDB
- ❖ GraphQL
- ❖ Redis
- ❖ CSS
- ❖ HTML
- ❖ Redux
- ❖ SASS
- ❖ Bootstrap
- ❖ Python
- ❖ Django

LANGUAGES

English C2- EF - SET

Spanish Native

Albanian Intermediate

QUALITIES

- ★ **Problem-solving skills:** Analyze complex problems and develop creative solutions.
- ★ **Communication skills:** Good verbal and written communication skills to effectively communicate with clients and team members.
- ★ **Adaptability:** Quick to learn new technologies and techniques and willing to continuously improve their skills.
- ★ **Attention to detail:** Ability to catch and fix
